DUO-RAKE AND TOUR SMOOTH® ASSEMBLY INSTRUCTIONS
11500’s - 11900’s

Head and Handle Removal

Unscrew bolt approximately 1/2” (Fig. 1). Using hammer drive bolt back in, to release cone (Fig. 2).

1. Handle should now separate from head (Fig. 3). Finish unscrewing cone from bolt.

Key No. | Description | Part No.
--- | --- | ---
1 | Head-Duo Rake | 11501
2 | Bolt | 11208
3 | Handle-Plain Aluminum with Cap | 11205
3 | Handle-Yellow Aluminum with Cap | 11515
3 | Handle-Green Aluminum with Cap | 11516
3 | Handle-Tan Composite with Cap | 11214
3 | Handle-Yellow Composite with Cap | 11215
3 | Handle-Green Composite with Cap | 11216
4 | Cone | 11204
5 | 15” Head-Tour Smooth® Rake | 11901
Not Shown | Cap-Aluminum Handle | 11206
Not Shown | Cap-Composite Handle | 11207
Not Shown | 22” Head-Tour Smooth® Rake | 12201

Assembly Instructions:

1. To Prevent Seizing of the Bolt & Cone, Use Anti-Seize Lube During Assembly
2. Insert bolt into rake head, threaded end to the handle side
3. Cone should be screwed finger tight inside rake head hub.
4. Place handle over hub until end of tube is against shoulder and tighten bolt against rake head until handle is tight. If using composite handle, sleeved end goes over hub.
5. Wet inside of cap with soap and water. Slip cap over handle.

DUO-RAKE AND TOUR SMOOTH® HEAD AND HANDLE REMOVAL

1. Unscrew bolt approximately 1/2” (Fig.1). Using hammer drive bolt back in, to release cone (Fig. 2).
2. Handle should now separate from head (Fig. 3). Finish unscrewing cone from bolt.
