

What is GREEN ACTIVATOR?

Green Activator is a mineral based liquid fertilizer with a proprietary blend of nitrogen, phosphorus and potassium plus humic and fulvic Acids which treat the soil as well as the turf. As a cost effective soil conditioner, Green Activator provides soil nutrition for residential, commercial and sports turf needs. Green Activator has been tested in numerous side-by-side comparisons and the results are extremely positive, as evidence by the photo below.

Actual results. No photographic enhancements.

What are HUMIC AND FULVIC ACIDS and why are they important?

Humic and fulvic acids are known as humic substances and occur naturally in soils and sediments by biodegradation of dead organic matter. Increasing humic and fulvic acids in the soil have proven to be beneficial to many plant and soil reactions. The range of benefits include enhanced root growth, increased nutrient uptake, increased bio-mass, increased photo synthesis, better overall plant health, less plant disease, better soil health and decreased soil compaction.

APPLICATION GUIDELINES

Application	Pre-Plant	Foliar
Rate	46 oz./acre 1.06 oz./1,000 sq. ft.	46 oz./acre 1.06 oz./1,000 sq. ft.
Mixture	20-100 gallons of water/fertilizer/herbicide solution ¹	20-100 gallons of water/fertilizer/herbicide solution ¹
Placement	Broadcast	Broadcast
Timing	Before planting	1+ times/season ²
¹ The amount of carrier is dependent on soil type. ² The timing of foliar application is dependent on environment. Please contact your local dealer.

What are the POTENTIAL BENEFITS of Green Activator?

- Increases drought tolerance
- Enhances root development
- Improves plant health — increasing tolerance to disease and pests.
- Increases nutrient uptake from the soil
- Loosens compacted soil
- Accelerates turf repair (areas of poor condition and heavy usage)
- Increases bio-mass (wider blades for increased photosynthesis)
- Expedites return from dormancy (grass becomes green before non-treated areas)
- Increases stress tolerance
- Increases blade resiliency (springs back under heavy usage — homes with children, parks, golf courses and sports fields)
- Absorbs into the plant within 15 minutes
- Mixes easily with herbicides, pesticides, insecticides and fungicides (saving you time!)
- Green Activator won't harm other plants

THE FORMULA FOR BETTER TURF

What needs GREEN ACTIVATOR?

Golf Courses	Sod Farms
Why is it so valuable for Golf Courses? <ul style="list-style-type: none">• Naturally healthy turf through better root development• Low nitrogen inputs for the latest turf hybrid varieties• Improved rooting results in quicker top growth regeneration post play• Excellent carrier for a variety of fertilizers, herbicides, fungicides and plant growth regulators	Why is it so valuable for Sod Farms? <ul style="list-style-type: none">• Improved blocking• Improved rooting results in quicker top growth regeneration post harvest• Fewer call backs• Excellent carrier for a variety of fertilizers, herbicides and fungicides• Make the most of your growing season
Sports Turf	Lawns
Why is it so valuable for Sports Turf? <ul style="list-style-type: none">• Low nitrogen inputs for the latest hybrid turf varieties• Improved rooting results in quicker top growth regeneration post play• Better blade resiliency in high contact applications• Excellent carrier for a variety of fertilizers, herbicides, fungicides and plant growth regulators	Why is it so valuable for Lawns? <ul style="list-style-type: none">• Naturally healthy turf through better root development• Increased drought tolerance• Low nitrogen inputs for the latest turf hybrid varieties• Excellent carrier for a variety of fertilizers, herbicides, fungicides and plant growth regulators
