

Application Guide

What is the application rate and how is it mixed?

GreenActivator® is a liquid product applied at a rate of 48 oz. per acre or 1.1 oz per 1,000 sq. ft. (1.42 L per 4,046 m² or 32.5 mL per 92.9 square meters). It may be combined with water, UAN, fertilizer and/or herbicide using agitation during mixing and before application. A 30-plus gallon of total solution per acre is recommended (113.5 liters per m²). Further details can be found at standardgolf.com/greenactivator

- Store above 40° Fahrenheit
- Follow label and mixing instructions
- 48 oz per acre or 1.1 oz. per 1,000 sq. ft.
- 30+ gallons of total solution per acre
- Add to the last third of tank
- Mix well, agitate
